

PREPARED FOR (CLIENT)

Client Organization: Environmental Inspection & Consulting Services

Contact Person: Project Director / Operations Team

Location: Dallas-Fort Worth, TX / United States

SERVICE PROVIDER

Prepared By: Syeda Fatimah (Lead Solution Architect)

Email: thelynkoapp@gmail.com / info@lynko.app

Platform: Standalone Production Native Android App (APK)

1. INVESTMENT SUMMARY & MILESTONE DELIVERABLES

MILESTONE DELIVERABLE / ENGINEERING LAYER	PLATFORM	STAGE	AMOUNT (USD)
 Section A: UI/UX Design & High-Glare Field Ergonomics Interactive mobile wireframes, outdoor high-contrast field typography, unified 3-tab layout, and digital signature modal.	Android	Milestone 1	\$500.00
 Section B: Native Android Application Core & Media Engine PO management suite, cassette inventory steppers, high-resolution camera photo attachments, and Google Play Services OAuth.	Android	Milestone 2	\$800.00
 Section C: Dynamic EPA Multi-Page PDF Compilation Engine EPA/NVLAP compliant PDF generator with auto-pagination, dual digital signature binding, and instant in-app preview.	Android	Milestone 3	\$450.00
 Section D: Cloud Database Sync & Automated Lab Dispatch Google Firebase Firestore real-time cloud sync, persistent offline local cache, and verified laboratory email dispatcher.	Android	Milestone 4	\$250.00
UI/UX Design Subtotal:			\$500.00
Mobile Engineering & PDF Subtotal:			\$1,250.00
Cloud Sync & Dispatch Subtotal:			\$250.00
TOTAL CONTRACT VALUE:			\$2,000.00

2. GRANULAR FEATURE & NATIVE INTEGRATION SPECIFICATION

 Module 1: Authentication & Account Management

- Native Google Play Services Integration:** 1-tap sign-in powered by official Google Play Services SDK (@react-native-google-signin/google-signin) with zero browser redirect latency.
- Native Account Chooser Modal:** Automatic session clearance to present the full Google Account Picker bottom-sheet, allowing inspectors to select any device account or add new credentials.
- Email / Password Authentication:** Direct Firebase Auth engine with automatic account creation, password reset workflows, and secure session management.
- Automated Email Verification:** Dedicated verification dispatch and delivery tracking via custom SMTP integration (thelynkoapp@gmail.com).
- Persistent Local Auth Session:** Encrypted token storage with AsyncStorage for instant app cold-starts without re-login requirements.

 Module 2: Projects & Inspection Lifecycle Dashboard

- Unified 3-Tab Architecture:** Clean segregation between All, Drafts (in-progress field jobs), and Submitted (finalized & sent to lab) inspection records.
- Instant Search Engine:** Real-time filtering across PO numbers, project titles, physical site addresses, descriptions, and sampling dates.

- **Status Visual Badging:** High-visibility badges clearly distinguishing active field drafts from finalized lab submissions.
- **One-Tap PDF Viewer:** Direct access to view and print the official signed Chain of Custody PDF directly from any project card.
- **Safe Record Management:** Touch-optimized deletion with safety confirmation dialogs and automatic Firestore synchronization.

Module 3: EPA Digital Chain of Custody & Sample Matrix

- **9 Specialized Media Media Presets:** Pre-configured tracking for Asbestos PCM Cassettes, Asbestos TEM, Bulk Samples (Drywall, Tile, Mastic), Endotoxin, Polycarbonate Air Filters, PTFE Membrane Filters, Spore Trap Cassettes (Air-O-Cell), Surface Tape Slides, and Viable Via-Cell Cassettes.
- **Batch Stepper Counter:** Interactive SampleTypesScreen stepper allowing inspectors to tap +/- on physical cassettes in their field kit to auto-generate sample rows.
- **Dual-Tier Analysis & Turnaround Management:** Global analysis configuration (e.g. Asbestos PLM, TEM Analysis) and rush turnaround selection (e.g. Next-day rush, 2-Hour Emergency).
- **Granular Sample Fields:** Sample ID, Room / Location Description, Material Property, Flow Volume Measurement & Units (L, pc, in²), and individual Analysis 1 & 2 toggles.
- **Batch Auto-Fill Productivity Suite:** 1-tap sequential re-numbering (1, 2, 3...), mass area description population, and measurement auto-fill.

Module 4: Hardware Camera & High-Resolution Photo Engine

- **Native Camera Capture:** Direct hardware integration via expo-camera to capture timestamped site conditions.
- **Photo Library Integration:** Multi-photo selector via expo-image-picker for attaching existing building inspection photos.
- **Photo Grid Management:** Visual thumbnail gallery with numbered badges (#1, #2...) and large touch-target removal controls.
- **Full-Resolution Lab Attachment:** Automatically bundles all site photos alongside the official PDF document during email lab submission.

Module 5: Digital Signature Capture & EPA PDF Engine

- **Vector Signature Canvas:** In-app touch/stylus signature modal (react-native-signature-canvas) with instant clearing and base64 export.
- **Dual Legal Signatures:** Dedicated capture and binding for both *Relinquished By (Field Sampler)* and *Received By (Laboratory Courier)*.
- **Multi-Page Vector PDF Compilation:** Client-side PDF engine (expo-print) rendering strict EPA/NVLAP laboratory grid tables.
- **Automatic Pagination:** Automatically paginates 15 samples per page with synchronized headers, company info, and total sample counters.
- **Native Device Preview & Sharing:** Opens PDF directly in Android's native print/PDF viewer for immediate verification.

Module 6: Cloud Synchronization & Automated Lab Email Dispatch

- **Google Firebase Firestore Backend:** Encrypted cloud database synchronization under isolated user paths with zero security vulnerability.
- **Offline-First Resilience:** Full local persistence (AsyncStorage & Zustand) allowing field inspectors to log samples in zero-reception basements with automatic sync upon re-connection.
- **Automated MailComposer Dispatch:** 1-tap email generation pre-populating recipient laboratory, PO subject line, sample counts, PDF attachment, and photo files.
- **Recipient History Memory:** Automatically records and suggests frequently dispatched testing lab email addresses (e.g. EMSL, Eurofins, SGS).

3. TERMS OF DELIVERY & PAYMENT SCHEDULE

- **Fixed Contract Price: \$2,000.00 USD** (Includes all 6 modules, source code, and standalone production Android APK).
- **Milestone Schedule:** 50% initial deposit (\$1,000.00) upon agreement; 50% balance (\$1,000.00) upon final APK testing and delivery.
- **Ownership & IP:** 100% intellectual property ownership transferred to client with zero recurring per-user licensing fees.
- **Warranty & Support:** Includes 30 days of complimentary post-delivery warranty and bug-fixing support.
